PROFILE

I have always been very keen on creating media; be it websites, apps, artwork, games or music. I am always trying to continuously learn and improve. My next ideal role has a clear progression path, where advancement to more senior roles is achievable.

KEY SKILLS

- Javascript; more specifically Vue (2 and 3), Vuex, jQuery and vanilla JS. I've used React in my spare time for a number of different personal projects.
- HTML, SCSS, Ionic, Vuetify, Material design, Bootstrap and other styling libraries.
- Node, SQL and PHP (Lumen).

EXPERIENCE

Senior Front End Developer, Accession Healthcare, July 2021 – Present

Front End Developer, Accession Healthcare, October 2018 – July 2021

I have been involved in the full lifecycle of producing web and iPad applications for international pharmaceutical companies. I have introduced and taught Vue and Vuex to the team to upgrade the legacy jQuery codebase. This has improved speed of development, performance of the final product, maintainability, code standards via ESLint, and improved tooling. I also use PHP (Lumen), Node and SQL to work on the backend of a number of different projects, as well as Docker and Github actions for deployment.

Front End Developer, RFA Advertising and Marketing, October 2017 – October 2018

This role involved creating promotional material for international pharmaceutical companies, including emails, websites and iPad apps. Projects were designed with Adobe Indesign, Photoshop and Illustrator, then marked up using HTML, CSS, Javascript and jQuery, utilising Github as source control.

Graduate Developer, Focus Solutions, July 2016 – October 2017

I worked in the product team, utilising Agile methodologies to create new products according to requirements from Standard Life. This involved using Javascript, HTML, CSS, jQuery, C#, SQL, XML and XPath.

EDUCATION

University of Portsmouth - BSc (Hons) Entertainment Technology 2013 – 2016

INTERESTS

- Playing guitar
 - Music production, DJing and sound engineering
 - Squash and tennis
